Industry and Market Overview

Overall, the economic growth of Taiwan in 2024 is expected to rely mainly on consumer spending and investment support, with an improvement in external demand. The Taiwan Institute of Economic Research predicts a domestic economic growth rate of 3.15% for 2024.

According to the IDC report, although enterprises continue to invest in digital transformation, the growth rate of the information services market declined to 3.8% in 2023 due to sustained inflationary pressure and uncertainty in the macroeconomic environment. The market size reached \$29.2 billion, and it is anticipated that the Taiwan information services market will reach \$30.4 billion in 2024, with a growth rate of 3.9%.

Driven by demands for sustainable operation, artificial intelligence applications, hybrid cloud applications, and next-generation security protection, the Taiwan information services market is expected to grow from \$28.64 billion in 2023 to \$33.52 billion in 2027, with a stable compound annual growth rate (CAGR) of 5%.
