# Core Business and Services

## ➤ Main Solution

- AI service integration expert
- Cloud integration & Services
- ESG Ecosystem Integration
- tiCC Smart medical
- tiCC intelligent customer service
- Smart Surveillance

## ➤ Main products

- Modern data center
- Endpoint and peripheral equipment
- Software/Technical Services/Education and Training
- Communication collaboration/network/information security

OneAi

OneCloud

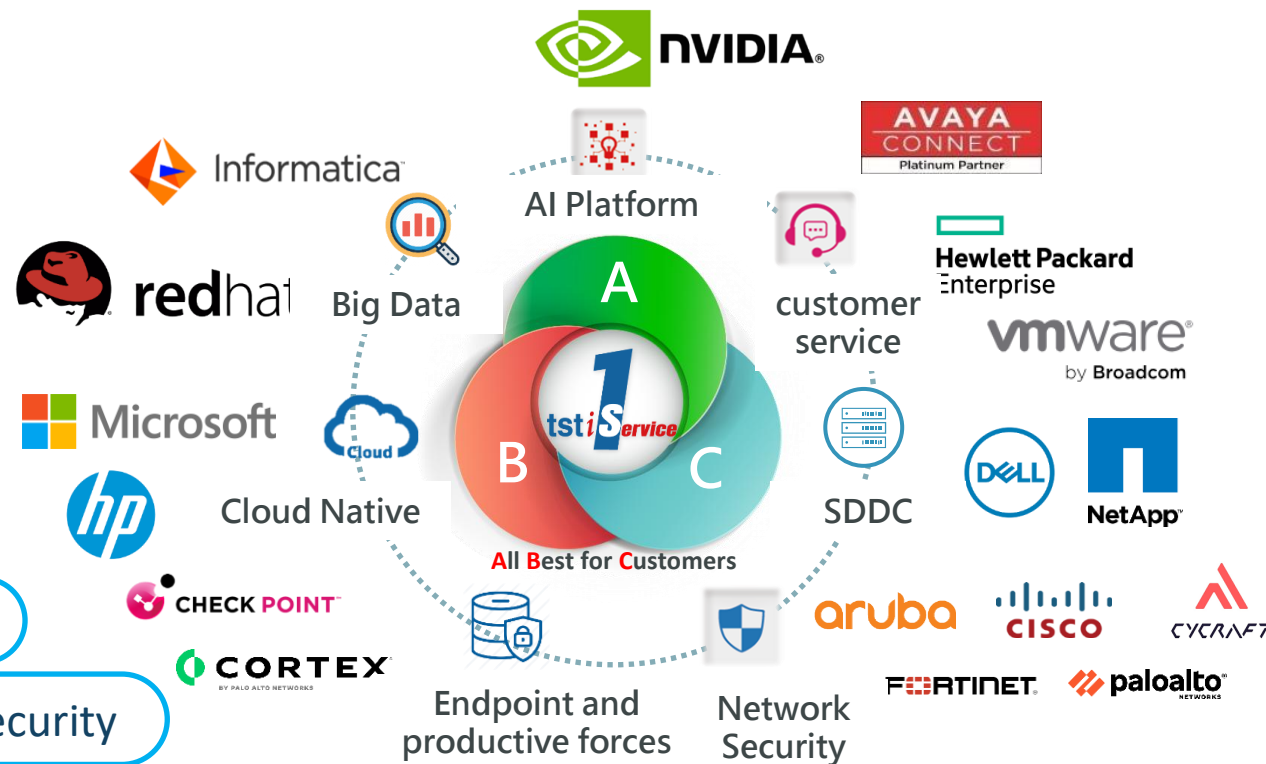

ESG AIoT

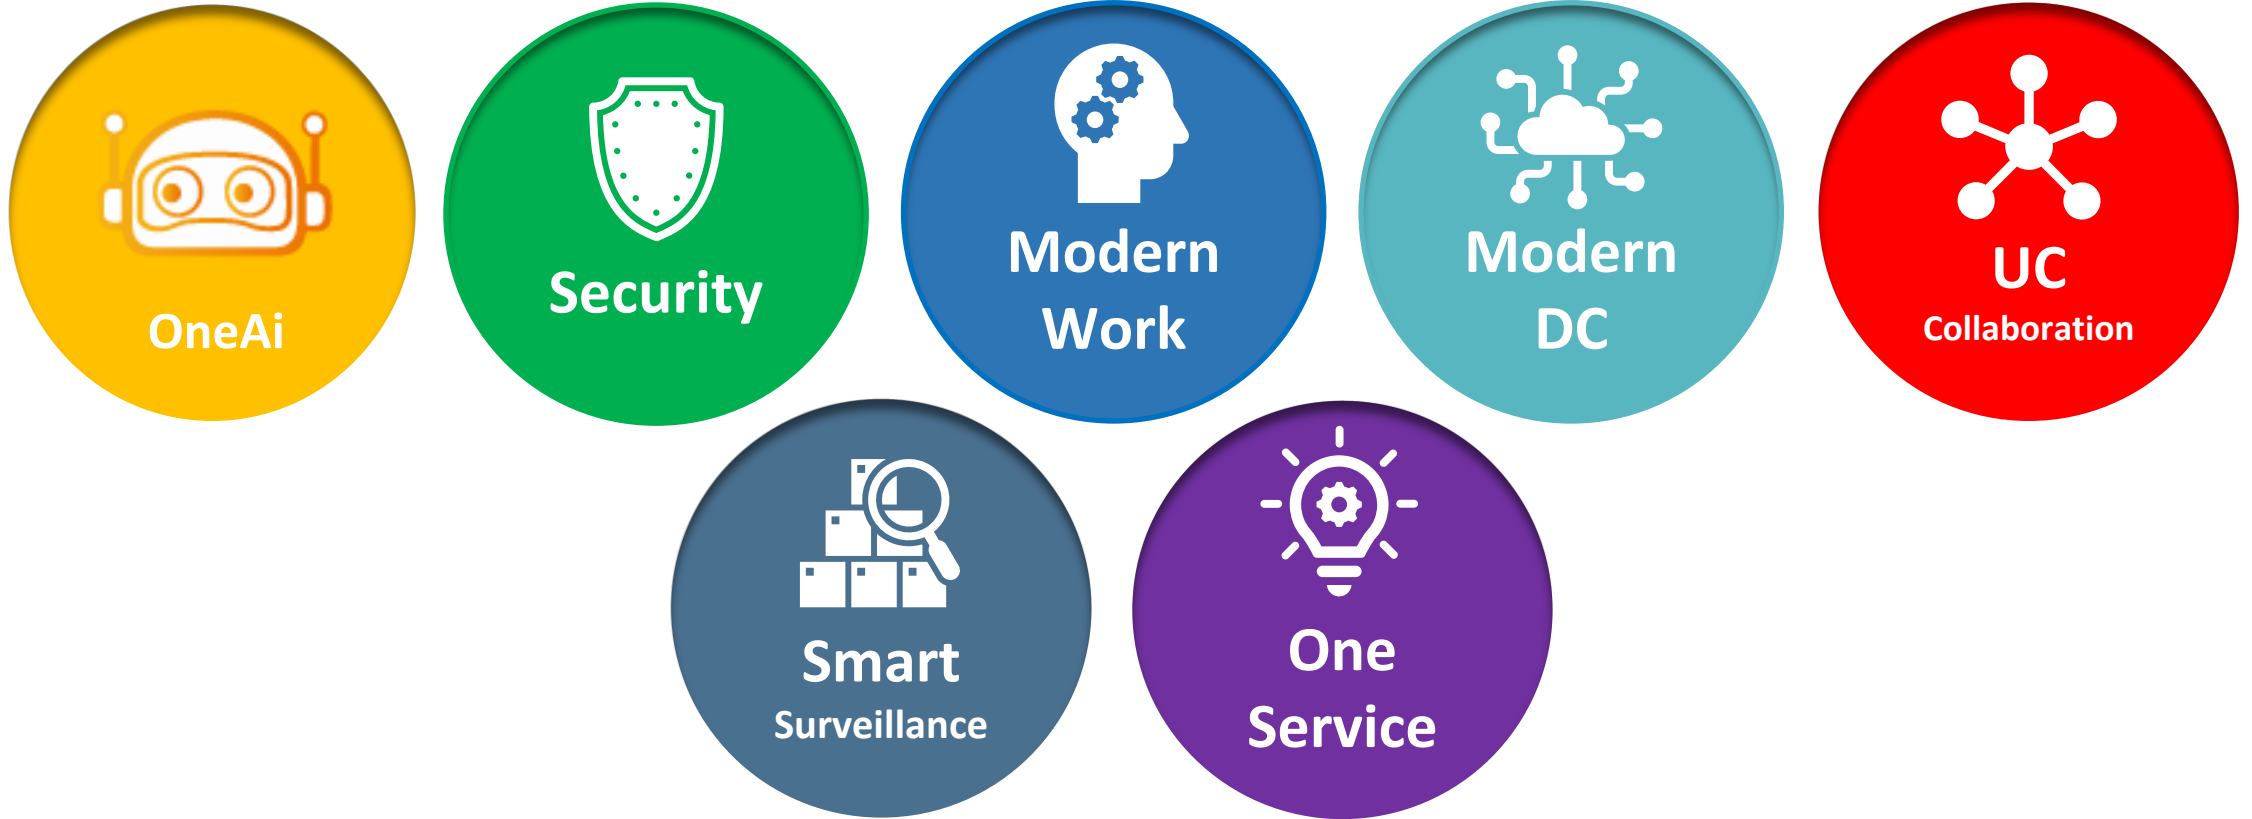

OneService

## Partners

# Enabling Industry Smart Transformation through AI Empowerment

**Ecosystem and OEM/ODM Partner Collaboration**

# Comprehensive Technical Solutions

## OneAi

- Computing power, management, data, and AI applications
- Enterprise-level AI expert assistant platform, industry-specific AI platform integration services
- AI Resource Management Standard Edition, AI Resource Management Advanced Edition

## Network Security

- Endpoint Information Security
- Network Information Security Application
- Information Security Cloud Information Security

## Modern Work

- User Centric
- Smart Terminal Productivity
- Smart Collaboration Tools
- Experience Security Asset Management
- Efficiently connect to cloud applications

## Modern DC

- Container Information Platform
- Big Data Hybrid Cloud
- Energy Efficiency and Green Operations
- Intelligent management and automation
- Edge Computing

## UC Collaboration

- Integrate different communication technologies for more efficient collaboration and communication
- Improve internal collaboration efficiency and enhance employees' work experience
- UC tools combined with comprehensive collaboration, instant sharing of team collaboration

## Smart Surveillance

- Comprehensive security integration and data sharing
- Flexible expansion of intelligent management to reduce the risk of errors
- Digital security instant alarm, efficient decision-making

**OneService**

Comprehensive Technical Solutions – From AI to Endpoint

## Recent Recognitions and Awards

## Condensed consolidated balance sheet

Unit: NT\$ thousand, except EPS

Items	2025/6/30		2024/6/30	
	Amount	%	Amount	%
Cash and cash equivalents	860,058	30	611,499	21
Notes and accounts receivable & Contract assets	958,507	33	879,601	28
Inventories	524,700	18	732,213	25
Property, plant and equipment	61,915	2	72,058	3
<b>TOTAL ASSETS</b>	<b>2,904,052</b>	<b>100</b>	<b>2,984,077</b>	<b>100</b>
Current liabilities	1,271,151	44	1,341,968	45
<b>TOTAL LIABILITIES</b>	<b>1,384,897</b>	<b>48</b>	<b>1,588,594</b>	<b>53</b>
<b>SHAREHOLDERS' EQUITY</b>	<b>1,519,155</b>	<b>52</b>	<b>1,395,483</b>	<b>47</b>
Net value per share (NTD)	17.15		15.76	

# Business Performance

## Condensed Consolidated Income Statement

Unit: NT\$ thousand, except EPS

	2025H1		2024H1		YoY
	Amount	%	Amount	%	
Net Operating Revenues	1,906,402	100.0	1,845,828	100.0	 3.28%
Gross Profit	449,141	23.6	433,175	23.5	 3.69%
Operating Expenses	342,733	18.0	350,686	19.0	(2.27%)
Operating Income	106,408	5.6	82,489	4.5	 29.00%
Nonoperating Income and Expenses	(4,188)		29,266		
Net income before tax	102,220	5.4	111,755	6.1	(8.53%)
Net income	81,835	4.3	93,514	5.1	(12.49%)
EPS-before tax(NTD)	1.15		1.26		
EPS-afer tax(NTD)	0.92		1.06		

Note: The significant year-over-year change in non-operating income/expense was primarily due to financial valuation losses in 2025, compared with gains in 2024. In addition, R&D subsidies were lower this year. Despite an increase in operating profit of NT\$16.7 million, profit before tax declined by NT\$8.4 million.

# Industry Trends and Market Opportunities

AI has become the main axis of emerging technology development, with more emphasis on vertical field implementation

Institutional	Future Technology Trends Forecast	
Gartner	Agent-based AI, AI governance platforms, disinformation security, post-quantum cryptography, ambient stealth intelligence, energy-efficient computing, hybrid computing, spatial computing, multifunctional robotics, neural enhancement	 AI
IEEE	Generative AI, the widespread adoption of drone services is reshaping logistics and disaster prevention applications, AI agent-based commercial applications are maturing, wearable devices and biomarker applications are expanding into healthcare and health monitoring, augmented AI, self-driving technology, AI-assisted drug development, AI medical diagnosis, brain-computer interfaces, space computing technology, smart agriculture, AI regulatory tools and policies, sustainable computing	 AR / VR
CB Insight	Human-machine integrated financial advisors, agent-based AI, the gradual integration of cryptocurrencies into the corporate financial ecosystem, downward revisions to fintech industry valuations M&A opportunities are emerging. Disease management AI systems, RNA therapeutics, and care robots are driving growth in the AI industry. Large language models are entering a period of explainability. Open source models dominate the lightweight market. The United States leads the AI arms race. Spatial computing is becoming a daily routine for businesses. Personalization in retail is inevitable. Future data centers and lower barriers to entry in the space sector are fueling an investment boom	 Blockchain
Deloitte	AI algorithms and spatial computing are becoming a focus. AI is expanding the scope and impact of IT functions. Cracking cryptography in the quantum era is a challenge. AI is fundamentally changing the process of core system modernization	 Cloud
WEF	Artificial intelligence and big data, quantum computing, 5G, and AI are optimizing manufacturing productivity.	 Data
		 Edge
		 Security Spatial Space

Looking at the trend forecast, we can find that key emerging ICT technologies in the future will mostly be **software-centric**. In particular, **AI has become the main axis of emerging technology development**. By **integrating vertical field knowledge** (such as transportation, finance, agriculture, robotics, healthcare, etc.), it will drive the implementation of emerging technologies in the industrial field. In addition, the governance, transparency, and explainability of models are also gradually gaining attention.

# Industry Trends and Market Opportunities

Amidst the impact of international developments, Taiwan's IT services industry revenue is projected to grow slowly through 2025.

Taiwan's IT services industry output value from 2016 to 2025

Unit: 100 million yuan

Source: Statistics Department, Ministry of Economic Affairs, MIC, May 2025

- The Covid-19 pandemic has accelerated the transformation of information architecture and application services among Taiwanese businesses. Driven by shifting business models, digital transformation, net-zero transformation, and emerging technologies like AI, these trends have become key growth drivers for the IT services industry.
- Beginning in 2023, the global economic landscape will be volatile, especially after the election of US President Trump. His aggressive policies are likely to restructure the global economic order, impacting corporate IT investment intentions and adding uncertainty to the development of the IT services industry in 2025.

- Corporate Governance and Sustainability
- Q&A

# Growth Strategies

Capitalizing on strong demand from both the public and private sectors for green sustainability, AI data center infrastructure, and AI applications

Seizing new business opportunities in smart terminal services, delivering solutions across four pillars: High Productivity, Security, Seamless Connectivity, Enhanced User Experience

OneService:  
Continued transition toward customer-centric service-driven growth, aiming for 20% annual service revenue growth

Focusing on network, cybersecurity, data management, and storage solutions to capture hybrid multi-cloud and modern data center opportunities

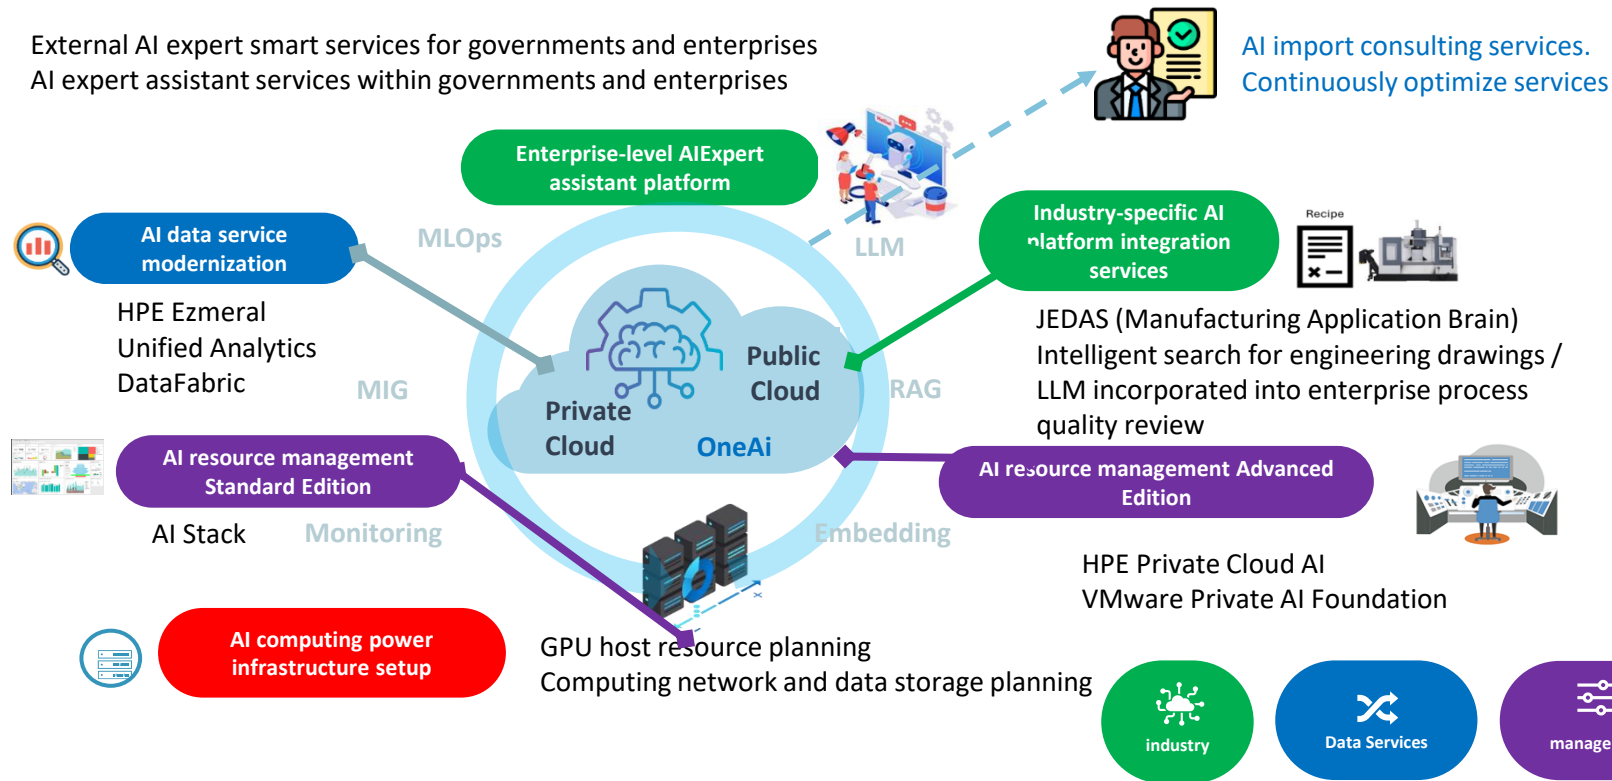

OneAI, OneCloud, Greenergy: Integrated ACE (AI + Cloud + ESG) total solutions addressing industry-specific AI enablement and dual transformation needs

**The AI wave is coming.  
TSTI leads the computing  
power and drives new  
growth in the industry!**

In factories, AI acts as a discerning foreman, helping to build factories and manufacture processes more accurately and rapidly.

In hospitals, it acts as a smart assistant physician, enabling precision medicine.

In cities, it acts as a dedicated steward, safeguarding public order and optimizing transportation.

In banks, it acts as a top-tier financial advisor, preventing fraud and generating profits.

# Corporate Governance and Sustainable Development

Sustainability Disclosure / Risk Management / Fulfilling Corporate Citizenship

## E – Environmental

GHG Inventory  
ISO 14064-1

### #Environmental Sustainability #Climate Policy #Green Initiatives and Actions

- ISO 14064-1 verification (2024–2025)
- Greenhouse gas emission reduction target: 20% reduction by 2030
- Five key green emission reduction initiatives
- Outstanding performance in annual green procurement recognized by Taipei City Government Energy Management Regulations and Waste Management Regulations(2024)
- ESG-Driven Business Models
- Promotion of environmental education and eco-activities.

## S – Social

Occupational Health and Safety  
ISO 45001

### #Friendly Workplace #Diverse Talent Development #Zero Occupational Hazards

- Certified as a “Sports-Friendly Enterprise
- ISO 45001 continuous improvement of workplace environment to ensure employee health and safety
- Increased participation in health checkups
- Ongoing participation in public welfare and support for disadvantaged communities
- New sustainable business models such as telemedicine and AIoT smart restrooms, contributing to carbon reduction and bridging the digital divide
- Industry-academia collaboration to help youth explore career paths and foster future talent.

## G – Governance

ISO 27001 ; ISO 20000 ; ISO 27701

### #Ethical Governance, Stakeholder Engagement, Business Continuity and Risk Management

- Digital transformation and sustainable transformation dual-axis strategy.
- Corporate governance rating has been improved for two consecutive years, and in 2024, the OTC companies ranked in the top 6%~20% (announced on April 30, 2025).
- Improve risk management,2025.05 Passed certification for ISO 27701 privacy information management.
- In line with international sustainability standards, such as SASB, TCFD and IFRS S2.
- Deepen the sustainable value chain.
